

## My Wartrol Warts Remover Review: Here's What I Really Think!

Face it. Most warts treatments don't work. Oftentimes people must resort to harsh chemicals or surgery to remove warts. And often, even after expensive surgery, the warts come back!

The problem is that the warts are caused by a virus (HPV) that you can't kill. So once you have it, you pretty much have it forever.

There's good news, however... You CAN stop the symptoms of warts so that they go away quickly and never appear again!

In this review, I'll be discussing a product I recently tried, PLUS I'll be going over some additional steps that you can take that will help in eliminating your warts quickly and permanently.

Keep reading...

Hi there! My name is John Spenser and welcome to my website. I am a wart sufferer who has been battling this disease for 12 years. On this page I'll be reviewing a new product I tested called Wartrol, as well as giving you some additional steps you can take to help eliminate your warts for good (without the need for expensive surgery or dangerous medications).

Now, let me start off by saying that I'm not a doctor or a health professional of any kind.

I never studied anything even remotely related to anatomy or biology in school. However, I do know a LOT about warts.

I know how embarrassing they are. I know how they can make you feel dirty. I know how they can make you feel like you may never have a relationship ever again. I've been through all that. I also know how warts, if left untreated, can lead to other, more serious medical conditions.

It's very scary stuff. And I lived through it. I experienced all the bad thoughts and feelings you're going through now.

But recently I've overcome it all. After struggling for years I've finally found a way to get through it and live my life wart free forever.

A big part of my breakthrough involves the product I'm reviewing on this page.

Let's get into the actual review now:

---

### My Review: Here Are My Honest To Goodness Thoughts On The Wart Removing Product Wartrol

I came across this product during some routine research I was conducting for my website. I was on a warts forum and I ran across a thread where people were openly debating this product and its efficacy. Some were saying it worked... some were saying it didn't.

This piqued my curiosity. Most “wart removing” products online don’t work as they are advertised. So most times when I see people talking about products on a forum, they are talking about how ineffective the product is. But with Wartrol, there were many on the forum who were saying that it had worked for them.

So I purchased 3 bottles (and got two for free! I’ll tell you how I did this in a moment, if you’re interested).

I have previously tried MANY OTC warts treatments. Most had zero effect. So I didn’t really hold much hope for Wartrol.

However, after just a few days of using Wartrol, I was seeing some VERY positive results. I was kinda shocked, actually.

I used Wartrol exactly as directed, and within just a few days the Warts were noticeably smaller. A few days later, they were completely gone.

I’d say it probably took around 8 days to see the full results.

Then, whenever I would have another outbreak, I used Wartrol again. And again, within about 2 weeks or so, the warts would go away.

It’s been about 2 years since I started using Wartrol and I’ve only had about 3 outbreaks. Each time I’ve used Wartrol to get rid of them.

Now, for full transparency, I will say that I use Wartrol in combination with a few additional steps.

Here are those steps:

1. Use Wartrol
2. Took a Men’s Daily Vitamin (to help boost my immune system).
3. Began exercising (I walk about a mile several times per week. I don’t go to a gym).

That’s it.

After dealing with Warts for 12 years, these 3 steps have been the most effective at dealing with the symptoms.

I’ve not had surgery and I’ve not used any prescription creams.

---

## Why Wartrol And The 3 Steps Work So Well

Let me talk about Wartrol first.

I love this stuff because – not only does it actually WORK – but it’s also clinically tested AND its ingredients are approved by the FDA. Most of the other creams you can find online aren’t clinically tested and they’re not approved by the FDA.

Most warts creams you find online are probably created in some dude's garage using grass clippings and motor oil 😊

Not Wartol.

Why does it work so well?

Wartrol works because it contains a high percentage of a powerful wart removing substance called Salicylic Acid. Now, a lot of wart removers may contain a little bit of Salicylic Acid. But Wartrol contains a LOT.

And it contains another "high tech" powerful secret weapon... Flexible Collodion. I know that sounds like something from a sci-fi movie ... but, believe me, it's not. It's a substance used in medical procedures. They put it over a wound and it creates a strong "film" that prevents any medicine that was applied to the wound from being disturbed.

In Wartrol the Flexible Collodion forms a strong film over the wart and HOLDS the Salicylic Acid in place so it won't be wiped or washed away by clothing or water! This means the full amount of acid stays on the wart, quickly dissolving it away.

I combined Wartrol with the 2 other steps and it's worked wonders for me.

Now, before I go on, I want to make sure you understand that I can NOT promise that Wartrol will work for you the way it worked for me. I don't know your physiological make up. However, I do know that it worked for me and for many others I've spoken with.

Now let's talk about the other two steps.

## 2. Started Taking A Daily Vitamin

I'm not what you'd call a "health nut". I don't eat a whole lot of fruits and veggies. This is a problem. See, your body needs that stuff in order to function at "optimum" levels and battle the virus that causes your warts. Well, I try and eat fruits and vegetables now when I can... which is still not as often as I should... So in order to make sure my body gets the nutrients it needs in order to make my immune system strong I take a multivitamin.

## 3. Started Walking.

I learned that you needed to exercise to make your immune system stronger. Well, I HATE exercise. I mean I HATE it. But I learned from my research that just simply walking 30 minutes a day can make a huge difference. So I started walking. Not every day but as much as I could. Probably something like 4 days a week I walk for about 30 to 45 minutes. I take my iPod with me and listen to podcasts or music. It's pretty great and relaxing and I get the recommended exercise I need to make my immune system strong.

That's it. That's all that I did. It may seem simple... and it kinda is... but it's a potent combination and it knocked my warts out!

---

## Wartrol Pros & Cons

Let's first start with the pros...

1. It works quickly. It may not be the same for everyone, but Wartrol worked really quickly for me.
2. It's safe. There's several ingredients in Wartrol that are very powerful, yet they are very safe. I'm not worried about pain or scarring.
3. The ingredients are approved by the FDA. The ingredients used in Wartrol are clinically proven and FDA-Approved for safe wart removal.
4. It's inexpensive. Compared to doctor's visits, surgery, and some other treatments, Wartrol is cheap! And it uses many of the same ingredients that doctors use to remove warts in their offices.
5. It's painless. Many of the treatments for Warts are painful. They often involve burning, freezing, or slicing the warts off. Wartrol worked for me without pain and without any side-effects.
6. A little dab will do ya. Just a little bit of Wartrol goes a long way! I bought 5 bottles and they have lasted me for 2 years.
7. It's simple and easy to use. Just use the easy application brush and apply the Wartrol directly to the wart. You let it dry for about 60 seconds. After about 20 minutes the Wartrol begins to dissolve the wart. It's so easy!
8. You don't need to see a doctor to use it. You don't need a prescription. You can purchase Wartrol from the official site (see below for a special offer for my readers).

## The Cons

To be honest, I don't really find any faults with Wartrol but here's a couple of things I have minor complaints about...

1. Delivery. Wartrol is only available online. You can't just run down to the store and buy it. However, the shipping is pretty quick. I think it only took mine 2 days to arrive. So it's not the end of the world. Besides, I tried most of the OTC wart removers from my local Pharmacy and none of them worked half as good as Wartrol.
2. It's got a funky smell. It's not a terrible smell, but it does smell medicinal. I suppose it's the powerful ingredients that make it smell the way it does. The smell does go away within a few seconds so it doesn't stick around.

## Check Out My Results From Using Wartrol

I can't show you too much, or else my site will get banned for "adult" content. However, I can show a small image with before and after results.

The "After" picture was taken about 6 weeks after starting Wartrol.

IMAGE

As you can see, there's no scarring. The skin's not even red where the warts had been.

It's pretty amazing to me, that after trying SO many treatments, and never really finding one that worked, Wartrol did the job so quickly and easily! I don't recommend things very often, but Wartrol is something I always recommend to other people I meet who are also suffering from Warts.

---

Wartrol Price: What A Bargain, Here's How I Got Several Bottles For FREE!

Wartrol contains very high quality, potent, and powerful ingredients that made my Warts go away in less than a few months. It's been 2 years since I started using Wartrol and I've only had a few outbreaks. Every outbreak I have, I simply use Wartrol and it keeps them under control.

Wartrol is very safe, painless, and doesn't leave scarring. You also don't need a prescription to get it. You can order it online and have it delivered right to your front door.

Because of all of these benefits, you'd think Wartrol would cost hundreds or even thousands of dollars. But it doesn't. It's very inexpensive for the peace of mind it can give you. I know that using Wartrol has dramatically changed my life.

Now, I purchased my Wartrol by clicking through a discount site. When I went through the discount site, I was able to get 2 free bottles of Wartrol. I'm not sure if the discount site still has the promotion. You can try. I checked not long ago and the discount was closed. You can try and see if they are running it again.

Just click on the link below to go to the discount site page that contains the Wartrol promotion.

---

Conclusion: Very Happy With Wartrol!

I've tried so many treatments over the past 12 years to get rid of my warts. I've really only had LASTING success with Wartrol.

I highly recommend that you try it yourself if you're suffering from warts. It's safe. It's powerful. It worked wonders for me.

Don't forget to check and see if the discount is still available here<<

Well, thanks for reading my Wartrol review. I hope it answered any questions you may have but if you do have any questions, please feel free to leave me a comment below.

Comments:

Thanks for this review. Helped me a lot. The discount was still on when I checked.

You're welcome! Glad to hear the discount worked for you!

=

Cheers!

Cheers back to you! Thanks for stopping by my site. Hopefully it helped!

=

I tried Wartrol and it worked. Not as well as it did for you, but my warts are out of control. I'll keep trying Wartrol and see if it gets better.

Hey, sorry to hear it didn't work as well for you as it did for me. I know that some people have far more severe cases and if that's the case for you, maybe try Wartrol a little longer and if it doesn't work, talk to a doctor.

=

Wartrol is every bit as awesome as you say! Got rid of my warts in a little over a month. Can't thank you enough. Only issue is the deal was off when I tried the discount site. Bummer I didn't save money but I did get rid of my warts. Thanks!

Hey! Glad to hear it, man! Sorry the discount didn't work. I don't know how that site works. You may want to check back again soon if you want to reorder Wartrol because I think sometimes they reactive the free bottles deal.

=

Thanks!

You're welcome! 😊

=

How many times a day did you use the Wartrol?

I used it 3 times a day for like the first week. Then just once a day after that. The warts started going away pretty quickly after the first week or two. Then I just kept at it until they were gone. Now I keep Wartrol handy in case of a flareup.

=

Damn! Just missed the discount.

Sorry 😞

=

Discount worked for me. Now to try Wartrol. Wish me luck!

Good luck!

=

Love the 3 steps. I have been trying to get healthier. It ain't easy. Now I gotta ad Wartrol to my routine.

The 3 steps saved my bacon! And I don't like getting healthier either. I'm a really lazy guy! But walking and taking a vitamin are about as much effort as I can put into it. Thankfully, just those 2 steps and the Wartrol worked for me. Hopefully they will work for you too! Keep in touch and let me know how it goes!

=

Thank you for this review.

You're very welcome.

=

Discount worked. Got 2 free bottles of Wartrol.

Good to hear! That should last you for a while.

=

What's the name of the Vitman you take?

I just take Men's One A Day Health Formula. Take one a day. Just don't like eating vegetables!

=

What's the link for the discount page? I can't seem to find it.

It's toward the bottom of the review. Here's the link if you don't want to look for it:

<http://www.couponsavings.net/wartrol-deal/>

=

Thanks, bro!

You're welcome my friend 😊
